Members are free to use the putting green, driving range and other amenities while waiting for tee times.

Member is paged when start time arrives.

Tee times are efficiently managed and maintained

New products developed by Long Range Systems address the needs of the golf and country club industry. The silent paging system will provide complete communication between members and staff.

System Options:

Staff Paging - Instantly locate staff from any phone.

Member Paging - Ideal for paging members waiting for tee times. Members feel free to enjoy warm up facilities, browse through the pro shop, or grab a bite to eat. Members can also be paged on their own cell phone.
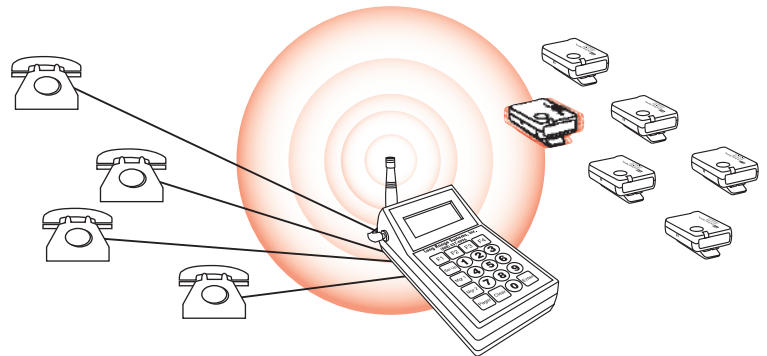

Server Call System - Allows servers to spend more time with members resulting in improved customer service and higher sales.

Electronic Survey System - Show members you care by asking for their feedback. Our system has the highest response rate in the industry.

T7400A Transmitter
(4"x9" footprint)

Adver-Teaser™

Ⓐ This Trinity system is ideal for paging from multiple locations. This transmitter can be located in the reception area while the telephone interconnect feature allows you to page from any room that has a telephone. You simply dial the transmitter's extension, and it prompts you for pager number, message, etc.

(Drawing 1)

TELEPHONE INTERCONNECT

1. Code entered via telephone

2. Transmitter sends page

3. Pager vibrates or displays message
