Patient & Family Paging

Coaster Call®

- Rechargeable NiMH battery
- Custom labels available (optional)
- Patented stack charging
- Shock-absorbing rubber bumper
- Available in Red, Green, and Blue

Patient Paging

Long Range Systems has been helping medical facilities provide quality patient care since 1993 with our on-site paging systems. These systems help streamline patient flow, improve staff efficiency and eliminate intrusive overhead paging.

They also help healthcare facilities adhere to HIPAA regulations requiring patient confidentiality. Just hand a pager to a patient when they check in and it will flash silently when the physician, nurse or administrator is ready to see them.

LRS pagers are ideal for any facility and department, including:

- | | | |
|-------------------|--------------------|--------------|
| • Hospitals | • Day Surgery | • Radiology |
| • Medical Offices | • Emergency Room | • Pharmacy |
| • Admissions | • Physical Therapy | • Laboratory |

Alphanumeric Coaster

- 250 character LCD display
- Rechargeable NiMH battery
- Multiple alert modes
- Patented stack charging
- Durable rubber bumper
- Available in Red and Blue

Family Paging

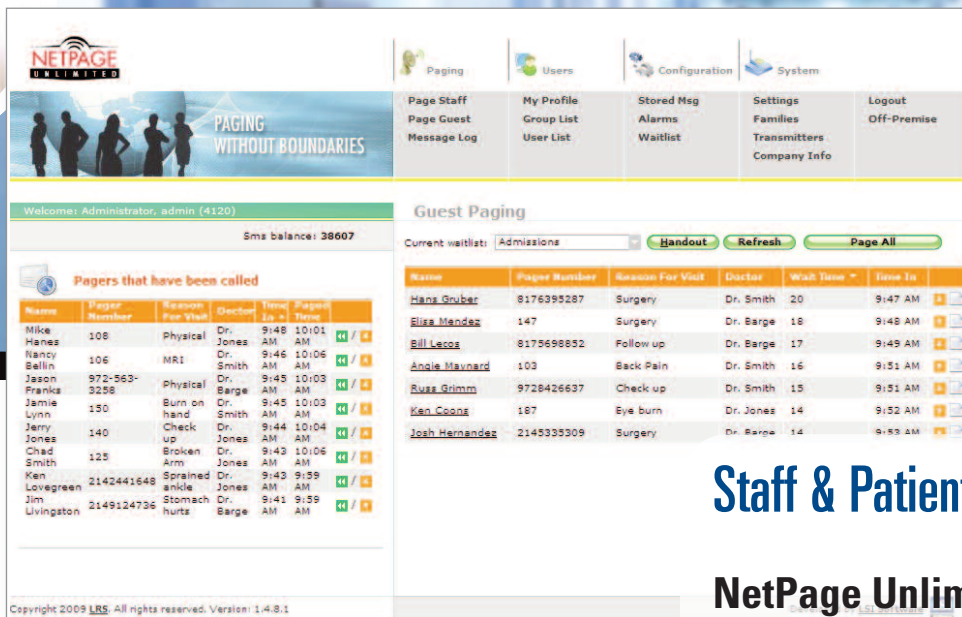

Give family members peace-of-mind. With LRS pagers, they don't have to stay in the waiting area. They can visit the cafeteria, gift shop, chapel or other areas with the confidence of knowing they can be reached instantly if needed.

Being able to find family members quickly also helps improve staff response time when caring for a patient. If a physician or nurse needs to consult someone, they send a silent page instead of waiting for them to return or searching for them. This is especially important in critical or emergency situations where every minute counts.

Adver-Teaser®

- Rechargeable NiMH battery
- Double-sided space for promotional inserts
- Four-Light message notification
- One-piece construction means no broken paddles

1. Open NetPage in a web browser
2. Click on a name
3. Type a message or select a stored message
4. Click Send

Alphanumeric Pager

- 250 character LCD display
- Multiple alert modes
- Auto off/on feature
- Uses 1 AAA battery
- Backlit display

Staff & Patient Messaging

NetPage Unlimited™ - Browser-Based Messaging

Better communication means better care. Your staff now has a convenient and discreet way to communicate within your facility. They can send detailed text messages to staff or patients via LRS alphanumeric pagers or cell phones. Entire departments can also be messaged simultaneously.

Benefits

- Improved response times (staff paging) — messages are received immediately
- Improved patient flow (patient paging)
- Increased Productivity — Accomplish more instead of searching for coworkers
- Professional Environment — Messages are sent silently and discreetly
- Eliminate Monthly Fees — Drop wide area paging for staff who don't need it

• No Monthly Fees*

• Waitlist Sharing

Setup patient waitlists for multiple departments. Seamlessly move patients from one department list to another.

• Patient & Family Paging

Notify waiting patients and families privately. Families have peace-of-mind and are no longer confined to the waiting area.

• Staff Paging

Doctor's, PAs, Nurses, or any employee in your organization can effortlessly communicate with each other.

• Text Messaging

Send text messages to cell phones to notify recipients virtually anywhere.

• Nurse Call - Coming 2010

With the push of a button, staff are notified via alphanumeric pager or SMS text message.

* No fees for paging but SMS Texting will incur fees

[Connect & Communicate]

Butler XP™

- Built for indoor or outdoor use
- Sends pages wirelessly (no hardwiring required)
- Pages individuals or groups
- On-site pager programming
- USB interface
- Uses 2 AA batteries
- 2.75" x 7" x 1.375"

Push-Button Staff Paging

With these push-button paging transmitters, staff members can contact each other instantly and silently from almost anywhere. Each button can be programmed to page a physician, nurse, administrator or anyone wearing an LRS Alphanumeric Pager.

Benefits

- Improve Patient Flow — Since doctors and nurses can page staff instead of searching for them, they can spend more time treating patients
- Maintain Patient Privacy — Silently call staff for sensitive procedures
- Greater Patient Satisfaction — Providing faster service promotes more satisfied patients and families
- Superior Staff Efficiency — Whether caring for patients or helping each other, instant communication helps dramatically improve staff efficiency

Butler II™

- One and five-button models
- Sends pages wirelessly (no hardwiring required)
- Program to only send pages during specified times
- Uses 3 AAA batteries
- 1.5" x 7" x .875"

Butler XP™

This powerful transmitter is perfect for any size hospital or medical facility. It's 100% weatherproof and made of heavy-duty lexan plastic so it can be used anywhere — inside or outside.

- Interval Re-Paging — Program how often you want it to re-page from 10 seconds to every 5 minutes (up to 10 minutes maximum)
- Expandable System — Up to 9,999 Butler XPs can be used at one location

Butler II™

The low-cost, short-range paging solution. This slim unit attaches to almost any wall, table or other surfaces and comes in one and five-button models.

Transmitters and pagers can be added to your system at any time. The Butler II can also be used as a door monitor or "doorbell". One dry contact can signal when a door has been opened or be used to page you when someone wants access to a room.

Rechargeable Alphanumeric Pager

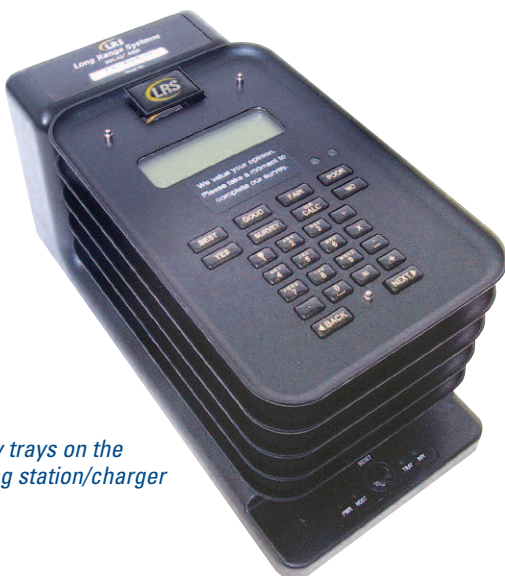

- Works with Butler XP and Butler II
- 20 character scrollable LCD display (255 maximum)
- Rechargeable NiMH battery
- Variable vibration strength
- Field programmable
- Multiple vibrate & tone alerts

Electronic Patient Survey Trays

Survey trays on the docking station/charger

Patient Survey System

The Electronic Patient Survey System, part of our line of Allegiant Loyalty Tools, is the quick, economical way to gather patient opinions and monitor staff service levels. This powerful survey system provides next day feedback and offers a true measurement of patient and family satisfaction.

Benefits

- **Daily Analysis** — Available online in PDF and interactive dashboard style reporting
- **High Response Rate** — Our system receives more responses than comment cards, phone or internet surveys
- **Realtime Data** — Act now on issues that are affecting patient satisfaction
- **Easy-to-Use** — This is an affordable, user-friendly solution for you, your staff, and your patients

Features

Daily Automated Data Transfer:

- Our docking station automatically transfers data nightly
- Features a dial-up analog line or ethernet line for data transfer
- Confidential data is transferred to a secure database

Complete Survey Design:

- Professional design staff will customize a survey to meet your needs
- Surveys are designed to capture and measure the key indicators that drove your business
- Surveys can be quickly changed and deployed to multiple locations
- Surveys can be offered in multiple languages

Daily and Weekly Reporting:

- Establish Benchmark Performance Ratings for each department
- Track employee performance by doctor, nurse, registration, and more.
- Multiple-Location Summaries can be broken down by area or region
- All raw data can be exported for use with other reporting applications

LRS: The trusted source for on-site communications

Experience

Since 1993, LRS has been the leading supplier of on-site patient and staff paging systems by providing the most effective solutions and listening to the needs of our customers.

Innovation

LRS has 21 patents on our products, and we offer more options than anyone else. Tell us what you need and we'll provide a system to help you improve patient flow and improve staff productivity.

- **Longer Lasting, Rechargeable Batteries:** Our Nickel Metal Hydride batteries on all our rechargeable pagers last much longer (around five years) and don't suffer from "memory" problems like other pagers. No need to turn them off and no more dead pagers.
- **Anti-Theft Mode:** A reminder tone in our pagers lets patients and staff know if they've taken a pager out of range. LRS transmitters can also send out an "Auto Locate" page to find any lost pagers within your hospital or offices.
- **UHF Technology Increases Range:** Even the largest hospitals and medical centers can use our pagers. We utilize Ultra High Frequency (420-470 MHz) technology that provides the best range and reliability available in a pager. This technology gives you a range of up to one mile — far superior to a 27 MHz system.

Quality

LRS is an engineering and manufacturing company. Our products are designed and assembled by us. We closely control quality, and we design solutions with features that are important to you.

- **Durable and Rugged Pagers:** Our rechargeable patient and family pagers have no battery doors or directly attached clips to break off. They're made of extremely durable Lexan plastic and are designed to be tamper resistant.
- **Separate Pager Holsters:** Instead of attached belt clips that break easily, our pagers are carried in separate pager holsters. This eliminates broken belt clips so you won't have to return an entire pager for repair.

Value

LRS has always been the leader in value-driven products. We guarantee the most features for the greatest value. Plus, when you factor in your increased patient satisfaction and staff productivity, our pagers are virtually priceless.

- **24/7 Technical Service:** Our friendly service department is located in the USA and available 24 hours a day, 7 days a week to answer any question you may have — even on holidays!
- **Warranty:** We stand behind the quality of our pagers and provide a full one or two-year warranty. Extended and lifetime warranties are also available.
