

FREEDOM

CELL PHONE MESSAGING & LRS PAGERS = THE COMPLETE SOLUTION

The new Freedom transmitter is designed to provide restaurants and guests with more freedom when managing wait times. The new function of the Freedom Transmitter is its ability to contact guests via text messaging, phone messaging or LRS pager. You now have the freedom to do what's best for you and your customers.

The Freedom transmitter is the only complete solution on the market for contacting guests. It combines the best of all technologies. Because it can call LRS pagers and cell phones, you will never have to worry about contacting guests. Text-only systems limit your ability to contact guests that either don't have a cell phone or who are reluctant to give out their cell number; whereas, the Freedom system ensures you can reach every guest, every time.

THE FREEDOM TRANSMITTER MESSAGES CELL PHONES AND ALL LRS PAGERS

LRS

BENEFITS

 The complete solution: works with LRS pagers and cell phones

The Freedom transmitter ensures you will be able to reach every guest - even those who don't have cell phones

- Reduce Startup Costs by 50%
 Notifying your guests via their cell phone minimizes the number of pagers required 50% or more over legacy paging systems
- Fewer pagers means reduced maintenance costs by 50% or more
- No delays between cell messages - send dozens of cell messages simultaneously
- Gives restaurants Freedom in how they contact guests
- Gives guests Freedom in how they wish to be contacted
- Promo button helps build your email marketing list
- Reduces walk-aways
- Increases table turns
- Reduces hostess stand congestion
- Improves host/hostess efficiency
